

LLSE CONTAINERS

Greek solar container communication station power outage

Overview

What happened to Greece's electricity system after the blackouts?

Greece's PM prompted an emergency meeting of the country's grid operators following the massive blackouts in Spain and Portugal. Following the widespread blackout that struck Spain and Portugal, Greece's government has heightened its alert level for the country's electricity system.

Why was cybersecurity a key topic during Greece's emergency energy meeting?

Nevertheless, cybersecurity was a key topic during Greece's emergency energy meeting. According to a government official speaking to OT, ADMIE and DEDDIE's systems are considered well-shielded against cyberattacks.

Why is Greece implementing green energy cuts?

Since early spring, Greece's transmission operator has been proactively instructing green energy cuts whenever risks to system stability arise. Thanks to these preventive measures, major disruptions were avoided during high-risk periods such as March 25 (Greek Independence Day) and Easter holidays.

Will ADMIE cut 'green' energy production in Greece?

ADMIE, responsible for the security of Greece's electricity system, is prepared to implement cuts in "green" energy production if necessary.
