

Harare Telecommunications Tower Base Station Company

Overview

Does TelOne have Internet in Harare?

TelOne operates an internet hub in Harare that boasts of over 10 Gbp international bandwidth (and growing). The hub is multi-homed with direct connections via 3 different undersea cables, namely Eastern Africa Submarine Cable System (EASSy), West Africa Cable System (WACS) and SEACOM.

Why should you choose TelOne for broadband access in Zimbabwe?

It is through this investment that TelOne now boasts of the fastest, most reliable and affordable broadband internet access services in Zimbabwe. TelOne also gets broadband internet bandwidth through the West African Cable System (WACS) and SEACOM.

Who is Tel-one Zimbabwe?

Tel-One is Zimbabwe's sole fixed telecommunication services provider providing Voice, Internet and Data services. We have a wide network distribution with infrastructure in almost every corner of this country and the network has grown to be the second largest fixed line network in the region after Telkom South Africa.

What is the transport layer in Zimbabwe?

This is the transport layer that interconnects cities and towns in Zimbabwe. The countrywide transmission backbone spans over 3000 km, using microwave radio, fibre optic and, in some cases, open wire systems. The bulk of the network is now digital, with a few links are still analogue
