# High quality 220 gfci breaker in Melbourne

## Overview

---

What is a Siemens qf220a GFCI breaker?

**Expected Annual Requirement** The Siemens QF220A is a 2 pole GFCI plug in circuit breaker. It has a 20 amp current rating and a voltage rating of 120/240V. These breakers are intended for use in Siemens EQ, Siemens Ultimate, ITE, and Gould load centers. They also are listed for use in panels from Pentair, Jandy, Hayward and Intermatic.

What are the different types of GFCI breaker?

THQP breakers allow the use of smaller load centers that save money and space in both new installations and service upgrades. 15 to 50A. 1" THQL breakers with options for 1 or 2 poles. This GFCI circuit breaker provides protection against overloads, short circuits and ground faults. 15 to 100A. THQB and THQC types.

What is a GFCI breaker used for?

Single-pole breakers are used for 120-volt circuits and protect one wire, while double-pole breakers are used for 240-volt circuits and protect two wires simultaneously. GFCI breakers are essential for areas prone to moisture, such as kitchens, bathrooms, and outdoor spaces.

Are combination AFCI/GFCI breakers worth it?

For comprehensive protection, combination AFCI/GFCI breakers offer the best of both worlds. These devices guard against both arcing and ground faults, providing a higher level of safety for your home's electrical system. While they may be more expensive than standard breakers, their dual functionality can be worth the investment for peace of mind.
