

High quality lfp powerstation in Botswana

Overview

What is the power sector in Botswana?

Revised in April 2025, this map provides a detailed view of the power sector in Botswana. The locations of power generation facilities that are operating, under construction or planned are shown by type – including liquid fuels, gas and liquid fuels, coal, hybrid, hydroelectricity and solar.

How does Botswana maintain its successful development path?

Key to Botswana maintaining its successful development path is the energy sector. Botswana's energy demand was about 3660 GWh in 2008 (peak load of 500 MW), which is projected to grow at about 6 percent per annum reaching 5300 GWh by 2017 (peak load of 850 MW) and 6890 GWh by 2026 (peak load of 1130 MW).

How rich is Botswana?

Income per head has reached US\$8,700 on a purchasing power parity basis, making the country a middle income nation and one of the wealthiest in per capita terms in Africa (GDP on a purchasing power parity basis is over four times the sub-Saharan Africa average). Over the past three decades, Botswana's economy has recorded impressive growth rates.

Why is the Limpopo River a transboundary project?

A unique feature of this project is its transboundary nature i.e. it involves crossing the Limpopo River, which is the national border between Botswana and South Africa. The Limpopo River catchment is of interest to various government departments in the countries that border the river, namely Botswana, South Africa, Mozambique and Zimbabwe.
