

Home UPS uninterruptible power supply home recommendation

Overview

Do you need an uninterruptible power supply (UPS)?

A power failure is more than an inconvenience—it can knock out essential equipment for hours on end. If you have important electronics that have to keep running when the power's out, you'll need an uninterruptible power supply (UPS). Many smart devices have built-in battery packs, with modern laptops packing enough cells to last a whole day.

Should I buy a ups for my home?

You may find that you're plugging in a lot more power-hungry devices into your home power supply, and this could lead to power cuts or power surges. Your home likely won't have the power backup solutions that your office does, so buying a UPS for your home could be a very wise investment.

What is a ups & how does it work?

What is a UPS?

UPS stands for uninterruptible power supply, it's a device that acts as a battery backup in case of an electrical power failure. Small UPS machines for homes and offices supply enough power for a few minutes, so there's time to turn off devices properly without losing any work.

Should I buy the best ups?

These days many of us are working from home, so buying the best UPS your budget can stretch to is even more important. You may find that you're plugging in a lot more power-hungry devices into your home power supply, and this could lead to power cuts or power surges.
