

How long can rooftop solar panels last

Overview

How long do solar panels last?

Connect with a local solar provider for maintenance and repairs. Solar panels generally last for 25 to 30 years; they can produce power after this, but at a significantly lower rate than their original output. Maxeon's warranty covers its panels for 40 years. Solar panels slowly degrade, resulting in less and less electricity production over time.

Do solar panels need to be replaced after 25 years?

After 25 years, your solar panels won't necessarily need to be replaced; however, their ability to absorb sunlight will be reduced. In this blog, we'll explain how long solar panels last, review solar panel degradation rates, and ways to make sure your solar panels last as long as possible.

Do solar panels expire?

There is technically no expiration date on solar panels. However, over time, they naturally tend to become less efficient at producing energy. Some panels can also break due to physical damage from extreme weather conditions.

How long do solar inverters last?

Solar inverters have a typical service life of 10 years. This means your solar panels will still have 15 years of guaranteed power output when your first inverter reaches the end of its service life. If you're considering a solar power system with energy storage, home batteries also have a typical service life of 10 years.
