How long can the eps battery cabinet supply power when the power is off

Overview

Is EPs a good option for a solar panel battery backup?

EPS or Emergency Power supply can be an expensive addition to any solar panel solution, however worthwhile under the right circumstances. If you are a UK home or business owner interested in discussing solar panel battery backup, contact our award-winning green team today on 0131 210 0405 for expert advice.

How long does an emergency power supply last?

An emergency power supply may last a few minutes, to several hours, or even days. However, the exact duration depends on many factors such as load demand, emergency power supply capacity, and fuel availability for generators. Typically, a EPS may provide backup power for a few minutes to an hour.

How much power does an EPS battery supply?

This is a manual action and in a power cut, you must pull this switch before any power is supplied from the batteries. You'll also need to be careful about what you turn on when in EPS mode. The EPS can supply up to 5kw of power (approx. 20A in the UK).

What happens if an inverter is cut – EPs or no EPs?

1) EPS or no EPS, if there is a power cut, the inverter will shut down completely. This is to protect any power line workers that may be working on them. As you can imagine, without this, the power lines could become energised by solar producing homes and that could be an unwelcome shock to someone who will assume the power is off!
