# How long does it take to repair a new energy external battery cabinet

## Overview

---

How long does a battery replacement take?

Physically it takes less than half an hour. But how long it will take for a particular customer depends on way too many factors including whether or not the correct replacement battery is in stock, how many technicians are available, and how many other jobs are in the queue to be performed. I personally waited about 90 minutes.

How long does it take to install a new battery?

The wait time is for (presumably) a battery to be produced and sent, via ship, to Baltimore, then FedExed (yes, they use FedEx) to your dealer. The original battery does not need to be returned prior to a new battery being sent. Actual install is a day or two once the battery arrives. For me, this process was 4 months from the red screen of death.

What is battery reconditioning?

**Battery Reconditioning Overview:** Battery reconditioning restores old or weak lead-acid, lithium-ion, or NiMH batteries to near-original performance by reversing chemical degradation using desulfation, cell balancing, and controlled charging techniques.

Can battery reconditioning prolong life?

Using techniques like desulfation, cell balancing, and cycle charging, you can extend battery life, save up to 80% of replacement costs, reduce electronic waste, and avoid common mistakes that 78% of mechanics rely on to prolong battery lifespan. Part 1. What is battery reconditioning?
