

How many base stations does Kampala Power have

Overview

What is the power Africa Uganda Electricity Supply accelerator?

Power Africa announced the launch of the new Power Africa Uganda Electricity Supply Accelerator in 2018. This Accelerator will facilitate the addition of 1,000 megawatts of generation capacity and 1,000,000 new electricity connections in Uganda by 2020.

How much electricity does Uganda produce?

Electricity is contributing only 1.4% to the national energy balance while oil products, which are mainly used for vehicles and thermal power plants, account for the remaining 9.7%. Concerning electricity generation, Uganda has an installed capacity of 822 MW, mostly consisting of hydropower (692 MW; 84%).

What is Uganda's Electricity supply system?

The electricity supply system in Uganda was developed during the 1950s and 1960s with the construction of the Owen Falls Hydropower Station (later renamed Nalubale Power Station) with 10 generators with a total installed capacity of 150 MW.

Can Uganda extend the power grid to rural areas?

The Government of Uganda has limited resources for extending the grid to rural areas. At the moment, the Government's focus is on solving the power supply crisis that is crippling the national economy. Based on an improved power generation it will concentrate its efforts to extend the grid to major urban and peri-urban areas.
