

How many hydrogen energy stations are there in Kingston

Overview

How many hydrogen fueling stations are there in 2024?

According to statistics, global HRS deployments, under construction and planning, reached 1,680 units during the first half of 2024 (“planning” stations refers to those that are announced with locations or investors). Among the 1,680 units - there are 1,148 hydrogen fueling stations that have commenced operation.

How many hydrogen refuelling stations are there worldwide?

According to the latest figures from LBST’s H2stations.org report, the number of operational hydrogen refuelling stations worldwide has officially crossed the 1,000 mark. Specifically, by the end of 2024, around 1,160 stations were up and running - an impressive milestone for an industry once viewed as the distant future of clean mobility.

How many hydrogen stations are there in the world?

However, the global distribution of hydrogen stations remains highly concentrated. Only 10 countries had 10 or more HRSs, accounting for 92% of the global total. China, South Korea, Japan and Germany have more than 100 operating stations, together accounting for 72% of the global total.

Where are hydrogen refuelling stations located?

The first hydrogen refuelling stations in Bulgaria and Slovakia have been opened in their capitals. While many projects in Europe are still in the planning phase, the ratio of stations already in operation in East Asia continued to rise. 1 [Zheng 2024] Jinyang Zheng, "Hydrogen Industry in Developing Countries", ISO/TC 197, 06.12.2024
