

# How many watts does an outdoor solar light for home use need

## Overview

---

What wattage should outdoor lights be?

The recommended wattage for outdoor lights is 40 watts and lower. Up to 40 watts is ideal for lighting pathways, garden beds, and other landscape areas. Lights with a wattage between 40 and 80 watts are great for brightening areas like driveways, smaller yards, and the inside of your home.

How do you determine wattage for outdoor lighting?

The size of the outdoor area you wish to illuminate is the starting point for determining wattage. Small spaces like entryways and pathways require lower wattage fixtures, while larger yards, driveways, or garden spaces need proportionally more wattage to sufficiently light the entire area.

What wattage light should I use?

Lights with 40 wattages and below are ideal for lighting landscape areas, pathways, and garden beds. Notably, these lights are mainly used for lighting and not brightening the installation area. Lights within the 40 to 80 wattage category area are used in brightening their installation area.

How do I choose the right wattage for my outdoor space?

When selecting lighting for your outdoor space, determining the right wattage is key to creating an effective lighting plan. There are a few key factors to consider that will inform your wattage needs: The size of the outdoor area you wish to illuminate is the starting point for determining wattage.
