

How much is the price of energy storage batteries in Cameroon

Overview

In Cameroon, the cost performance of lithium batteries for energy storage is notable: The price of lithium-ion batteries was approximately 139 U.S. dollars per kWh in 2023, indicating a competitive pricing structure¹. The capital expenditure (capex) cost for lithium-ion-based battery energy storage systems is around \$300/kWh, which reflects the investment needed for deployment². Lithium iron phosphate batteries, a subset of lithium-ion batteries, are preferred for grid-scale storage due to their cost and energy density advantages³. These factors suggest that lithium batteries in Cameroon offer a high cost performance for energy storage solutions.
