How to connect the ground wire of UPS battery cabinet

Overview

How do I connect a battery cabinet to an ups?

Connect the DC+ and DC- cables to the DC+ and DC- terminals. Connect the power cables in the UPS. If more battery cabinets are part of the solution, connect all battery cabinets to the UPS according to the diagram below.

How do you ground an ups cabinet?

Finally, bond UPS cabinets to the nearest interior ground bus, using a green, insulated 2 AWG grounding wire. Installers typically mount the main ground bar (MGB) of a UPS room 24 in. above the finished floor and use zones for best grounding results. Your UPS will do its job only when it has the right infrastructure to support it.

How to connect a UPS battery to a host?

F. Before connecting the battery cables from the battery cabinet to the host, measure the battery voltage with a multimeter, which should be 103.36V, and check if the positive and negative leads are correctly connected. If there is a battery box, connect the batteries in series and link them to the host as required. 2. UPS Battery Wiring Example A.

How to install a ups power supply?

The most important aspect of installing a UPS power supply is connecting the batteries. The key to connecting the batteries is to link the positive terminal to the negative terminal, connecting each battery in series, and then leading out two power cables, one positive and one negative, to connect to the air switch. C.
