

Huawei San Diego solar panel system

Overview

Does San Diego have solar panels?

The intense California sun is a boon to those with solar panels, as that bright sunshine spells more affordable power. San Diego currently has more solar rooftops than any other city in California, and with an average of 266 days of sunshine per year, that translates into a great deal of power collected by those panels.

Does San Diego have a rooftop solar system?

Those savings have spurred tremendous growth in rooftop solar installations in San Diego. New residential systems decreased by 36 percent between 2016 and 2017, according to the Center for Sustainable Energy. However, with new legislation requiring new homes to include solar, those numbers will likely increase.

Can I add solar energy to my San Diego property?

For a list of San Diego area PACE financiers, go to the Center for Sustainable Energy financing search map. The assessed value of your property cannot be increased based on the addition of a solar energy system per state law. But be aware that swimming pool and hot tub heaters are exempt from this law.

Where does Baker Electric Solar install solar panels?

The company has installed solar systems from San Diego to Sacramento and in the Sierra Nevada mountains. Baker Electric Solar offers ground- and roof-mounted solar panels. They design custom solar energy solutions for each home to determine which solar options are best for the customer.
