

Industrial energy storage power supply investment

Overview

Is lithium ion the future of industrial energy storage?

Lithium-ion retained an 80.2% share of the commercial industrial energy storage market in 2024, but sodium-ion is forecast to expand at a 37.8% CAGR to 2030 as buyers prioritize supply-chain security over energy density.

What is the market share of energy storage in 2024?

By technology, lithium-ion retained 80.2% of the commercial industrial energy storage market share in 2024, whereas sodium-ion is projected to surge at a 37.8% CAGR through 2030. By application, peak shaving led with 21.9% revenue share in 2024; EV fast-charging support is advancing at 28.5% CAGR to 2030.

How many gigawatts have been deployed in energy storage?

In sum, more than 40 gigawatts have been deployed, and the year isn't over, Canary Media reported. In eight years, energy storage went from a tiny player to one of the largest sources of new power on the U.S. grid.

How many batteries will the energy storage industry install in 2025?

Nearly a decade ago, when the energy storage market was in its infancy, an industry organization set a dreamy goal: By the end of 2025, the U.S. would deploy 35 gigawatts of batteries connected to the grid. So how'd the storage industry do?

In the third quarter, 4.7 gigawatts of batteries were installed.
