This Method Statement applies to all installations of Uninterruptible Power Supply at Project electrical works. Manpower and equipment shall be organized to meet the schedule as per the approved construction program. 3. Definition 3.1. Abbreviation UPS - Uninterruptible Power Supply QAQC - Quality Assurance Quality Control MS - Method Statement.

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) is a device that ensures that the load stays powered even if the grid blacks out. On a very simplified diagram, you can see how the direct current standby UPS works. When there is power on a grid, current flows first via an ACDC converter and then via a DCDC converter to the output.

What do you need to make an uninterruptible power supply?

For prototypes, you need a soldering iron, cuprextit boards, wires, solder, flux, and the components listed later. For measurement, you need a multimeter, an oscilloscope, and a thermometer (or thermal camera). Step 1: What Is an Uninterruptible Power Supply?

.

How to install ups?

Installation Procedure UPS systems are to be installed as per the approved drawings, as per the new approved single-line diagram for UPS attached in the material submittal. The installation will begin by placing the UPS units in the pre-determined location. The input and output cables for each UPS will be connected.
