Internal structure of outdoor solar lights

Overview

What are the components of a solar light system?

The essential solar light components consist of fixtures which contain LED bulbs and come in wall light and solar lantern designs. The functionality of solar lighting systems increases through the addition of motion sensors and controllers and mounting brackets as accessories.

What is a solar LED fixture?

A solar LED fixture is a component in a solar light system that houses a light. With solar LED lighting, fixtures come in arrays of several LED fixtures embedded into a full array. It is the part of the system that holds the light bulb. Check your manufacturer documentation to learn about the wiring of your fixture. LEDs have expanded the range of available fixtures.

How do solar lights function?

A solar light is a system of parts that works in harmony to generate power from solar exposure, store power, and re-use that power in an efficient manner to light a general or specific area. (Stephen Shickadance, 'How Solar Lights Work').

What are essential solar lighting components?

This section covers recommendations for essential solar lighting components. Nuts and Bolts are one of the most widely used components. They are typically made of 201 stainless steel, which is lightweight, very strong, and resists corrosion. This steel uses manganese and nitrogen to conserve nickel.
