

# **Kyiv Mobile Energy Storage Container Three-Phase**

## Overview

---

Will a new battery storage facility strengthen Ukraine's grid?

Sept. 10, 2025. (Bohdan Nazarenko/DTEK) Ukraine's biggest private energy firm, DTEK, has launched a major battery storage facility that will bring power to hundreds of thousands of homes and strengthen the grid ahead of expected Russian attacks this winter, the company said.

How will batteries help Ukraine's power grid?

Once operational, the batteries will help stabilize Ukraine's electricity grid and keep the power supply steady, avoiding emergency power outages. The project was developed in partnership with American energy company Fluence Energy Inc.

How much electricity will DTEK store in Ukraine?

According to DTEK, the project can store 400 megawatt-hours of electricity — enough to power 600,000 Ukrainian homes for two hours. DTEK announced that commercial operations are scheduled to begin in October 2025, just before Ukraine's critical winter heating season.

Why are we laying the foundation of a new energy system in Ukraine?

"We are laying the foundation of a new energy system in Ukraine because bringing an energy storage system of this scale into the Ukrainian power grid means that we are building an absolutely new, much more resilient energy system in the country," Maxim Timchenko, DTEK CEO told the Kyiv Independent in Rome.
