

Kyiv box-type UPS uninterruptible power supply production

Overview

What is an uninterruptible power supply?

Uninterruptible power supplies provide power to critical loads in the event of a power failure. Unlike emergency generators, UPS systems provide power immediately, but only for a short period of a few minutes - until a backup power supply comes online or until the load completes its shutdown sequence.

What is a Mitsubishi Electric uninterruptible power supply (UPS) system?

Mitsubishi Electric uninterruptible power supply (UPS) systems provide daily power conditioning as well as backup power in the event of an outage to reduce damage to manufacturing equipment and maintain uptime for your production line.

What factors will drive the UPS market globally?

Factors such as the rising trend towards the internet of things (IoT) and smart buildings, a growing number of datacenters across the globe, virtualization, and cloud computing are expected to drive the UPS market globally in the coming years. Uninterruptible power supplies provide power to critical loads in the event of a power failure.

Why should you use a Mitsubishi Electric ups?

A UPS can support power quality and backup requirements across a number of manufacturing industries, eliminating damaging spikes and dips, providing increased uptime, and allowing for a controlled shut off in the event of power loss. Leverage Mitsubishi Electric UPS as power conditioner and backup power system to reduce downtime in manufacturing.
