

Lead-acid battery style container base station

Overview

What is a lead acid battery container?

Lead Acid Battery Container - for safe battery storage and transportation. The Battery Transport & Storage (BTS) Container was purposely designed as a lead acid battery container, for the regulation compliant, safe and environmentally responsible storage and transportation of used lead acid batteries.

What is a battery container?

UNISEG's Battery Container is designed for the safe and convenient storage and transportation of waste / used lead acid batteries (car & automotive).

What is a battery transport & storage container?

The Battery Transport & Storage Container, helps companies comply with the various regulations governing the storage and transportation of lead acid batteries. And thereby meet their “duty of care” and “chain of responsibility” requirements.

What are lead acid batteries used for?

Batteries collected mainly include car batteries and other automotive application but also include lead acid batteries used for solar, UPS and other industrial applications. The popularity of this service and the BTS Containers is growing every year. Why Wood Pallets Shouldn't Be Used For Transporting Lead Acid Batteries?
