

Levo UPS Uninterruptible Power Supply

Overview

What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supply (UPS) | Schneider Electric Hong Kong, China. An Uninterruptible Power Supply system provides emergency power when the main source fails, using batteries to ensure a continuous supply. It conditions incoming power, protecting equipment from fluctuations. We offer various UPS power supply types for different needs.

What is an UPS system & how does it work?

UPS systems are commonly used in computers, server farms, and data centers to ensure uninterrupted operation and protect digital data from power-related disruptions. The function of a UPS depends on the application's power requirements.

Who do you partner with for uninterruptible power supplies?

We only partner with suppliers who meet our stringent supply chain standards for quality (ISO 9001), health and safety (ISO 18001), and environmental management (ISO 14001). Browse our full selection of uninterruptible power supplies or contact us today if you have any questions regarding our range. Call 0800 088 5412.

Why do you need a 3-phase UPS system?

It also serves as a reliable battery backup. A 3-phase UPS system is crucial in data centres, edge computing, and industrial applications where uptime and data integrity are vital. It protects servers, storage systems, networking equipment from power quality issues.
