

Libya Commercial Solar Power Generation System

Overview

Will TotalEnergies build a 500MW solar project in Libya?

At the recently held Libya Energy & Economic Summit 2025 (LEES), TotalEnergies announced that it expects to progress its 500MW Sadada solar project this year. The project is being built in partnership with the General Electricity Company of Libya and the Renewable Energy Authority of Libya (REAoL).

What is a 500 MW solar plant in Libya?

Once completed, the 500 MW plant will be one of the largest solar power projects in the region, as highlighted in this PV Know How article. This project is a significant achievement for Libya, a nation grappling with energy shortages and an overreliance on oil and gas.

Can solar energy be used to generate electricity in Libya?

(Kassem et al., 2020) performed a study analysis of the potential and viability of generating electricity from a 10 MW solar plant grid-connected in Libya. The consequences of that study indicate that Libya has a massive potential of solar energy can be utilised to generate electricity.

What are Libya's planned solar projects?

Libya's planned solar projects align with the government's National Strategy for Renewable Energy and Energy Efficiency, which outlines plans to achieve 4 GW of combined solar and wind capacity by 2035. Construction of the TotalEnergies-led solar plant project is expected to commence from 2025.
