Luxembourg household energy storage installation data

Overview

Which energy sources are used in electricity production in Luxembourg?

Electricity generation fed into the grid The visualisation shows the share of the various energy sources in the production of electricity fed into the grid in Luxembourg. Imports and exports, as well as self-consumed production, are not taken into account. Electricity generation from wind turbines.

How is natural gas consumed in Luxembourg?

Data based on “Observatoire digital de la mobilité”. Monthly natural gas consumption and imports. Since there is no gas production in Luxembourg and biogas production is very low, natural gas consumption is essentially equivalent to national gas imports. The data comes from the transmission system operator (Creos).

What information does Creos Luxembourg provide?

The grid operator, Creos Luxembourg S.A., provides the necessary information to guide consumers in adopting the right actions and ensuring a secure electricity supply for all. The number of publicly accessible charging points and the total charging capacity installed in Luxembourg.
