Majuro energy storage liquid cooling container manufacturer

Overview

What is a 5MWh liquid-cooling energy storage system?

The 5MWh liquid-cooling energy storage system comprises cells, BMS, a 20'GP container, thermal management system, firefighting system, bus unit, power distribution unit, wiring harness, and more. And, the container offers a protective capability and serves as a transportable workspace for equipment operation.

What is hj-g0-6250l energy storage container system?

HJ-G0-6250L 6.25MWh Energy Storage Container System, with the advantages of large capacity, high security and long service life, is suitable for a variety of application scenarios, providing a reliable guarantee for energy storage and management. Note: Specifications are subject to change without prior notice for product improvement. Data Sheet.

Where is the liquid cooling unit located?

The liquid cooling unit, firefighting system, confluence chamber, and power distribution room are located at one end of the cabin, with the liquid cooling unit taking up the majority of the space. The liquid cooling piping runs along the bottom of the cabin, while the firefighting piping and wiring are laid out at the top.
