

# **Mbabane 100MW grid-connected energy storage power station**

## Overview

---

What is a 'grid-forming & energy storage' station?

The station employs innovative "grid-forming + energy storage" technology to proactively stabilize grid voltage and frequency, ensuring the secure and stable operation of the power system while addressing grid stability challenges. Dalian ConCurrent Energy Storage Project - known as the World's largest VFB project in city center.

What is the largest grid-forming energy storage station in China?

This marks the completion and operation of the largest grid-forming energy storage station in China. The photo shows the energy storage station supporting the Ningdong Composite Photovoltaic Base Project. This energy storage station is one of the first batch of projects supporting the 100 GW large-scale wind and photovoltaic bases nationwide.

What is a 100 mw/400 MWh energy storage system?

This project features a 100 MW/400 MWh energy storage system designed to enhance grid stability and accommodate high levels of renewable energy penetration. Envisioned as a 200 MW/800 MWh project divided into two phases, Phase I was successfully commissioned in 2022.

What is Ningxia power's energy storage station?

On March 31, the second phase of the 100 MW/200 MWh energy storage station, a supporting project of the Ningxia Power's East Ningxia Composite Photovoltaic Base Project under CHN Energy, was successfully connected to the grid. This marks the completion and operation of the largest grid-forming energy storage station in China.
