

Middle East solar container outdoor power BESS

Overview

Is large-scale energy storage a viable option in the Middle East?

Until recently, large-scale energy storage was barely a consideration in the Middle East, where fossil fuels have long dominated power generation. With renewable energy projects expanding across the region, energy storage has started gaining traction.

Which countries are deploying a 300 MW solar PV system?

In Egypt, AMEA Power recently signed power purchase agreements to develop the nation's first utility-scale BESS project, a 300 MWh system. The BESS project is an addition to the 500 MW Abydos solar PV project under construction. Meanwhile, UAE's EWEC has recommended deploying 300 MW/300 MWh of BESS capacity within the next three years.

Who will supply battery energy storage system (BESS) equipment?

Utility-scale renewable energy developer-operator Masdar said on Friday (17 January) that it has selected CATL to supply battery energy storage system (BESS) equipment alongside fellow Chinese companies Jinko Solar and JA Solar as solar PV module suppliers.

Is energy storage gaining traction in the Middle East?

With renewable energy projects expanding across the region, energy storage has started gaining traction. Unlike Europe, North America, and Asia, where renewable energy and storage technologies are well-established, the Middle East remains in the early stages of development.
