

Mobile radio solar container communication station construction

Overview

Why do petroleum companies use mobile solar containers?

Petroleum companies often operate in distant locations with limited access to grid power. This is where a mobile solar containers can act as an additional power source to run the equipment. Good choice for disaster reliefs whenever it is important to deliver electricity as quickly as possible.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

What is a self-unloading mobile solar container?

Self-unloading mobile Solar Container. Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work.

Why should you choose a mobile solar container?

The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility. Great protection for the sensitive solar arrays against storms, vandalism, and all kinds of possible threats. Mobile solar containers application visuals.
