

# **Moldova offshore wind power integrated energy storage project**

## Overview

---

The Republic of Moldova will install a 75 MW energy storage system (BESS) and 22 MW internal combustion engines as part of a project funded by the U.S. Government through USAID. How many MW of wind and solar energy is installed in Moldova?

, deployment of wind and solar energy in Moldova has been very slow. As of 2022, only 97.9 MW of renewable capacity for electricity generation was installed. Figure 1. Installed electricity generation capacity by type. 4.4 MW / 13% Non-renewable: 441.4 MW / 79% Renewable Energy Potential. The Republic of Moldova features great potential.

Can energy storage technologies be used in an offshore wind farm?

Aiming to offer a comprehensive representation of the existing literature, a multidimensional systematic analysis is presented to explore the technical feasibility of delivering diverse services utilizing distinct energy storage technologies situated at various locations within an HVDC-connected offshore wind farm.

Are energy storage systems a viable alternative to a wind farm?

For this purpose, the incorporation of energy storage systems to provide those services with no or minimum disturbance to the wind farm is a promising alternative.

Are secondary and flow battery technologies necessary for offshore wind farms?

Techno-economically feasible secondary and flow battery technologies are required to enable future offshore wind farms with integrated energy storage. The natural intermittency of wind energy is a challenge that must be overcome to allow a greater introduction of this resource into the energy mix.

## Moldova offshore wind power integrated energy storage project
