

Monterrey Mexico develops solar air conditioner

Overview

In order to minimize the energy costs that are increased by the use of mini splits during the summer, doctoral students from the Instituto Tecnológico y de Estudios Superiores de Monterrey (ITESM), belonging to Tecsol, incubation cell of the educational campus, advance in a platform to generate air conditioning and refrigeration through solar thermal collectors whose technological basis is the optimization of the heat generator that is in the refrigeration equipment. How many solar panels are in Monterrey?

Part of an \$18 million plant expansion investment, the newly installed solar panel array is the largest project of isolated battery-powered supply in Mexico. In total, close to 10,000 panels have been installed across Monterrey's three plants, with plans to be producing energy in 2024.

What makes Monterrey a responsible energy management company?

The Monterrey site's responsible energy management relies on continuous improvement, strategic project development and implementation and company culture. To reduce energy waste, the team has invested in significant upgrades and replacements in leak testers, illumination technology, roofing and air compressors.

Why should you buy a solar hybrid AC/DC air conditioner?

Electricity bill can be saved a lot. STIN will keep solving the global environment problem. The solar hybrid AC/DC air conditioner can work without battery, it works with unstable solar panel DC power at day time. At night or rainy days it automatically get grid AC power. It's mainly used for school classroom, hospital, restaurant, shops, office.

What is Trane Monterrey doing?

Our team at Trane Monterrey is taking bold action to lead the way in responsible operations, installing photovoltaic panels and a biological wastewater treatment plant to reduce absolute energy consumption and achieve net positive water consumption for production across three plants.

Monterrey Mexico develops solar air conditioner

[They develop a project based on solar energy for air conditioning](#)

May 24, 2011 · Mexico. In order to minimize the energy costs that are increased by the use of mini splits during the summer, doctoral students from the Instituto Tecnológico y de Estudios ...
