

Nauru Energy Storage Power Plant Quote

Overview

Does Nauru have solar power?

Due to its equatorial location, Nauru has limited need for hot water, which has limited interest in solar applications. Currently, all energy on Nauru is provided from predominantly fossil fuels for electricity generation.

What are the renewable energy sources in Nauru?

The renewable energy sources in Nauru are solar radiation and a small amount of biomass. However, as the electricity is supplied from diesel generation and has been abundantly available over the past 80 years, these other renewable energy sources have not been extensively exploited.

What is Nauru Utilities Corporation (NUC) project preparatory technical assistance?

The project will also support the institutional strengthening of Nauru Utilities Corporation (NUC). Project preparatory technical assistance was used to carry out project-enabling activities such as a Solar Power Expansion Plan for Nauru, project feasibility study, detailed design, and plant procurement contract bidding documents.
