Netherlands Uninterruptible Power Supply Company

Overview

What is an uninterruptible power supply (UPS)?

An Uninterruptible Power Supply (UPS) is used for various applications such as computer, telecom, industrial, or medical equipment. It's crucial for applications where power must not fail, for instance, within operating rooms, data centers, tunnels, and telecom networks.

Who built the first rotary uninterruptible power supply system?

HEEMAF designed and built its first battery-based rotary uninterruptible power supply (UPS) system for a national telecom company. HOLEC designed and installed the first diesel rotary UPS system, a 300 kVA no-break system that was built for a data center application in northern Europe.

What is a 3-phase uninterruptible power supply (UPS)?

A 3-phase uninterruptible power supply (UPS) plays a vital role in data centers, edge computing environments, or commercial or industrial applications where uptime and data integrity are critical.

Why do you need uninterruptible power supplies?

Our uninterruptible power supplies protect critical industries today and our electrical energy conversion systems are shaping a more secure and sustainable future. Our uninterruptible power solutions protect against mains power issues to ensure safe operation, protect people and reduce the risk of downtime and system failures.
