## Overview

---

### What is Renewables now?

Renewables Now is a leading business news source for renewable energy professionals globally. Trust us for comprehensive coverage of major deals, projects and industry trends. We've done this since 2009. More about us Premium access Stay on top of sector news with with Renewables Now.

### What are China's New Energy Solutions?

This means that new energy solutions are focusing more on protecting the land, water and air quality, as well as generating power. In China, several projects are going beyond gigawatts to create more adaptive, multifunctional systems that co-evolve with nature.

### What is the future of electricity?

By 2030, elec-tricity is projected to surpass coal as the dominant source of final energy consumption, with the electrification rate increasing from 28% to 35%, and reaching nearly 60% by 2060. Hydrogen energy holds significant potential in industries such as petrochemicals, long-distance transportation, and maritime shipping.

### Should China build a new energy system?

As a developing country, China continues to demonstrate significant growth potential in energy demand, making the pursuit of carbon neutrality particularly challenging. Accelerating the construction of a new energy system is therefore an essential strategy for reconciling economic development with emission reduction objectives.

## New energy sites are not online yet

### [Global Energy Trends: Clean Energy Growth and Rising ...](#)

2 days ago · Clean energy continues to dominate new power capacity. In 2024, more than 90% of all new electricity capacity worldwide came from clean sources such as solar, wind, hydro and ...

### [Latest Renewable Energy News , Renewables Now](#)

15 hours ago · News, interviews and comments for the global renewable energy industry with a focus on green hydrogen, wind energy, solar power, energy storage and PPAs.

### [New wind and nuclear energy sites currently without grid ...](#)

Aug 3, 2023 · Planned wind farms and nuclear sites are currently lacking enough cables to bring generated electricity to homes and businesses, putting major achievements from the sources ...

### [New energy solutions support supply security and nature](#)

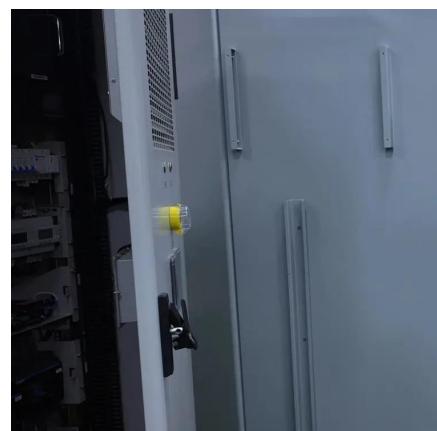

Jun 24, 2025 · In China, many new energy solutions are going beyond gigawatts to focus on protecting the land, water and air quality as well - co-evolving with nature.

## [A startup discovered a hidden source of abundant, clean energy ...](#)

3 hours ago · Geothermal energy is a potential gamechanger. It offers the tantalizing prospect of a huge source of clean energy to meet burgeoning demand. It's near limitless, produces

...

## [The Global Trend of Turning Power Plants Into Clean Energy ...](#)

May 1, 2025 · A trend is brewing across global energy markets: Aging coal and gas power stations are being converted into clean energy hubs. Instead of merely retiring these plants, ...

## [Outlook on China's New Energy System](#)

Jun 27, 2025 · This paper reviews China's progress in energy transition, identifies the key features of the new energy system, and employs the China Economy-Energy-Emission Model to ...

## [Renewable Energy Sites: Trends and Future Potential](#)

Oct 7, 2025 · The future of renewable energy sites looks promising. Advancements in technology, along with supportive financing and robust policies, create fertile ground for new projects. In ...

## [The State of Energy Innovation 2025 - Analysis](#)

Apr 2, 2025 · Explore a database describing the state of play for 18 key technology milestones related to energy security, sustainability and economic benefit that should be achievable by ...
