

New solar panel installation in East Africa

Overview

How many solar panels were installed in Africa in 2024?

2.4 GW of new solar capacity was installed in Africa in 2024. South Africa and Egypt continue to be leading the pack, but new emerging markets are stepping up. While this is a slight decrease from 2023, the shift reflects a broader regional market transformation.

Which countries are leading solar energy adoption in Africa?

Africa is experiencing a significant surge in solar energy adoption. This growth is expected to continue as more projects are underway. South Africa leads the continent, while North African countries like Egypt and Morocco also contribute significantly.

Which African country has the most solar projects?

South Africa remains the most active African country, but hosts “only” 28 per cent of the current construction activity,” the report said. “Algeria, Egypt, Angola, Tunisia and Zambia are other hot spots for African solar and account for 75 per cent of all current solar construction activity together with South Africa.”.

How much does solar cost in Africa?

Capital costs for solar are 3 to 7 times higher in Africa than in developed countries, and the continent only receives 3% of global energy investment - fare from the \$200 billion per year needed to achieve energy access and climate goals.
