

Nordic new energy supporting energy storage policy

Overview

What is the largest energy storage park in the Nordic region?

Romina Pourmokhtari, Sweden's Minister for Climate and Environment, officially inaugurated the largest energy storage park in the Nordic region. The initiative, led by Ingrid Capacity in collaboration with BW ESS, consists of 14 large-scale energy storage systems with a total capacity of 211 MW/211 MWh.

How many large-scale energy storage systems are there in Sweden?

The initiative, led by Ingrid Capacity in collaboration with BW ESS, consists of 14 large-scale energy storage systems with a total capacity of 211 MW/211 MWh. This milestone investment represents a significant step toward Sweden's goal of achieving a carbon-neutral energy system.

Are the Nordics sustainable?

The Nordics also punch far above their weight when it comes to sustainability. According to the latest Environmental Performance Index, Denmark ranks first overall among 180 countries worldwide, with Finland third, Sweden fifth, and Norway twentieth. Recent reports from the IEA back up the region's positive environmental progress.

How is digitalisation transforming the Nordic power sector?

Digitalisation is transforming the Nordic power sector, enabling smarter, more efficient, and more resilient energy systems. Advanced digital tools are being deployed across the value chain, from generation and grid operations to market platforms and customer interfaces, enhancing transparency, automation, and responsiveness.
