

North America Energy Storage Projects 2025

Overview

How much energy storage capacity will be installed in 2025?

In the near term, the report projects that 15 GW/49 GWh of energy storage capacity will be installed across all segments in 2025. The utility-scale segment is expected to grow 22% YoY in 2025.

Will battery storage set a record in 2025?

Battery storage. In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 when power providers added 10.3 GW of new battery storage capacity.

How much energy did the US add in 2024?

The U.S. added 48.2 GW of utility-scale solar, wind, and battery storage capacity in 2024. capacity in 2024 than in 2023. • Solar and batteries accounted for 89% of new clean energy deployment. of new capacity added. New natural gas capacity made up just 5% of the country's new power capacity.

Will utility-scale energy storage grow 22% yy in 2025?

The utility-scale segment is expected to grow 22% YoY in 2025. As the market evolves, continued innovation, supportive policies, and strategic planning will be crucial to navigate the changing landscape and capitalize on the immense potential of energy storage in the U.S. energy transformation.
