

Norway outdoor power wholesale

Overview

Who buys and sells electricity in Norway?

Power producers, suppliers, industry and other participants buy and sell power in competition with other market participants in the electricity wholesale market. The wholesale market facilitates export from, as well as import to, Norway.

Does Norway have a power market?

Norway is part of a joint Nordic power market with Sweden, Denmark, and Finland, which in turn is integrated into the European power market through interconnections to the Netherlands, Germany, the United Kingdom, the Baltic states, Poland, and Russia.

When did Norway introduce market-based power trading?

Norway introduced market-based power trading in 1991. Instead of planning a gradual transition to market-based solutions, as many European countries did, Norway opened the market to all customers from the very beginning. Hence, Norway was the first country to provide universal market access.

How do electricity contracts work in Norway?

In addition to the market price, the customer must pay a markup. Such contracts are the closest households and smaller businesses get to the day-ahead market. The Norwegian Consumer Council maintains a website, [www.konsumentrad.no](#), where it is possible to compare all the different contracts offered by electricity suppliers.
