

On solar container grid inverter 5kw for sale in New-Zealand

Overview

What is a solar inverter?

A solar inverter converts the energy output from solar panels into a usable electricity form, to be used in your home or business. Our range includes grid-tied, hybrid and off-grid inverters. A Grid-tied Inverter is designed to connect to supplement your home or business' mains power.

What is a hybrid inverter?

The Hybrid Inverter enables you to optimise the amount of power you generate and consume, and minimise transfer of energy to/from the grid or generator power. You can increase the proportion of self-use energy generated by your solar system, from 20% to more than 80%!.

What are the different types of solar inverters?

Three-phase: developed for higher yield and more suitable for commercial environments. Hybrid inverters: have the option to draw power from the grid or your energy storage system. Hybrid inverters are great during power blackouts. There are several finance options to help with your move to solar, including 0-1% bank loans. [Learn more.](#)

How do solar inverters work?

Inverters seamlessly integrate with your solar system, providing stable and consistent power for your home or business. They help deliver innovative energy management for more significant savings and energy independence.
