

LLSE CONTAINERS

Ottawa power generation container manufacturer

Overview

What is a twin power container?

The Twin Power container solution is a container that combines two engine/alternator assemblies with/ without CHP in a 40ft container, making it perfect for applications that require variable or continuous power. Because you have two generators on a single platform, you have the flexibility you need to meet a 100% load or even a smaller load.

What is the Ottawa cogeneration plant?

The Ottawa Cogeneration Plant is a 74 MW combined cycle cogeneration facility, powered by a single LM 6000 PC gas turbine and a steam turbine. The plant has a long-term contract to supply steam, hot water, and chilled water to member institutions of the Ottawa Health Sciences Centre.

How many MWM containers have been installed worldwide?

270 containers with 245 MW el have already been installed worldwide. Complete MWM Container solutions: read about intelligent and complete turnkey systems for decentralized energy generation (combined heat and power plants – CHP). The components are configured to your individual needs.

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300-3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.
