

# **Palau Centralized Energy Storage Power Station Project**

## Overview

---

Philippines-based power producer Solar Pacific Energy Corporation (SPEC) appointed DNV as Owner's Engineer for the 15.3 MW solar power and associated 13.2 MWh battery energy storage system (BESS) in Ngatpang state on Babeldoab, the largest island in the Palau archipelago. What is a solar PV project in Palau?

With a capacity of 15.3 MWp solar PV and 12.9 MWh BESS, the project supports Palau's goal of achieving a 45% renewable energy share by 2025. The project's total investment of USD 29 million contributes to Palau's energy independence, clean power generation, carbon emissions reduction, and local employment opportunities.

Who is launching Palau's first solar PV + battery energy storage system?

Alternergy Holdings Corp. and its subsidiary Solar Pacific Energy Corporation have inaugurated Palau's first solar PV + battery energy storage system (BESS) project, marking a significant milestone in the region.

How will solar energy be produced in Palau?

Solar electricity will be produced by a hybrid 15.3 MWdc (13.2 MWac) solar photovoltaic (PV) plus 10.2 MWac/12.9 MWh battery energy storage system facility. Extensive safeguards to protect Palau's pristine environment SPEC did not leave any stone unturned to protect the pristine Palau ecosystem.

Does Palau rely on fossil fuels?

As a small island developing state, the Republic of Palau sought to wean itself off its dependence on fossil fuel for power, which accounts for 99.7% of the country's power generation. To address this issue, Palau invited Solar Pacific Energy Corporation (SPEC), Alternergy's solar developer, to develop a clean, renewable energy source.
