

Poland Krakow rural solar power generation system

Overview

What is Poland's energy for rural areas program?

Poland has relaunched its Energy for Rural Areas program, offering loans covering up to 100% of solar installation costs in rural areas. The second funding round has a budget of PLN 1 billion (\$242.6 million).

Will solar power be a good investment in Poland in 2025?

Thanks to additional government subsidies for small private PV systems and high electricity prices of over 30 eurocents per kilowatt hour for companies, investments in own electricity generation in both areas will become attractive in 2025. In September 2024 alone, PV systems with a total power of 363.53 megawatts were installed in Poland.

When will Poland reach a 20 gigaWatt photovoltaic capacity?

Share of renewables in the energy mix in Poland from 1965 until 2023. Poland will reach an installed photovoltaic capacity of 20 gigawatts by the end of this year.

Is Poland a good country for photovoltaics?

Since the parliamentary elections in 2023, the current policy has been considered EU-friendly, which is having a positive impact on the expansion and promotion of photovoltaics. Poland is self-sufficient when it comes to electricity.
