

Poland flow battery energy storage

Overview

How much money does Poland spend on battery energy storage?

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately €1 billion).

How much does the PGE battery project cost in Poland?

The project comes with a price tag of PLN 1.5 billion (\$345 million), and the PGE Group has submitted an application for financing through Poland's the National Power System (KPO). LG Energy Solution Wrocław, the Polish subsidiary of the Korean battery giant, won the public tender with a bid of PLN 1.555 billion (\$384 million).

Why is energy storage important in Poland?

With the rising share of intermittent renewable power, large-scale battery storage systems are becoming critical to maintaining grid stability. By addressing challenges such as peak load balancing and frequency regulation, energy storage enhances the resilience and flexibility of Poland's electricity system.

What is Poland's energy storage subsidy?

Learn about Poland's €1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.
