# Portugal Porto solar wind power generation system

## Overview

---

Why is wind energy important in Portugal?

Its potential is even greater Wind energy is a major source of electricity in Portugal, and the wind supply chain has a strong footprint there. Whilst offshore wind offers new perspectives, the speedy permitting and repowering of onshore wind farms remain key for the country to keep reaping the fruits of wind energy.

How much wind power does Portugal produce?

Total wind power capacity is 5,671 MW. Wind power capacity in Portugal increased by 28 MW in 2022. Portugal produces 13.27 TWh from wind energy, which accounts for 26% of the country's electricity consumption. The 2030 targets for renewable power capacity were published in the National Energy and Climate Plan (NECP) .

How many offshore wind projects are there in Portugal?

The country has just one offshore wind project that started operations four years ago. The Global Wind Energy Council has reported that Portugal has 131 GW of offshore wind potential, of which 117 GW (89%) should be floating due to the conditions of the seabed off the country's Atlantic coast.

How has Portugal adapted to its energy transition?

Portugal has made significant progress in its energy transition, focusing on increasing renewables generation and reducing carbon emissions. The country has set an ambitious goal to become carbon neutral by 2045 and has raised its renewable targets.

## Portugal Porto solar wind power generation system

### [Annual Report 2024 Portugal](#)

Nov 24, 2025 · ours more than in 2023 [4]. For Portugal mainland, the Portuguese transmission system op-erator (TSO) indicated an annual wind generation index of Figure 1. Installed and ...

### [Analysis of NECP-based scenarios for the implementation of wind ...](#)

Jun 1, 2025 · This study examines Portugal's electricity market outcomes in terms of prices, generation mix, and emissions for different wind and solar capacities, using the National ...

### [Wind and Solar Power Generation Perceptions: Towards a ...](#)

May 29, 2025 · New investments in wind and solar power are key to advancing the energy transition and reducing greenhouse gas emissions. While these technologies bring global ...

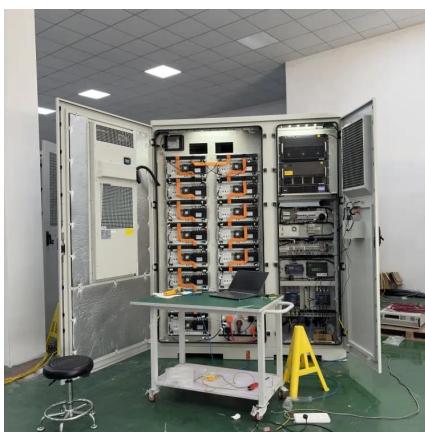

### [Model-Based Analysis of Sustainable Energy Transition: A ...](#)

Jun 12, 2024 · In the context of the R3EA project, funded by the Portuguese Foundation for Science and Technology (FCT), we analyse a set of selected future power system scenarios ...

## [Renewable energy generation sets new record in 2023](#)

Jan 2, 2024 · Renewable generation supplied 61% of the electricity consumption in Portugal in 2023, totalling 31.2 TWh, the highest-ever recorded value in the Portuguese national system. ...

## [Portugal needs more wind capacity to replace rising Spanish ...](#)

Oct 28, 2024 · Increased renewables share: Portugal has invested heavily in renewable energy sources, particularly wind and solar power. In recent years, renewables have accounted for ...

## [Wind energy offers many benefits to Portugal. Its potential is ...](#)

Jan 17, 2024 · Wind energy is a major source of electricity in Portugal, and the wind supply chain has a strong footprint there. Whilst offshore wind offers new perspectives, the speedy ...

## How Portugal Is Leading the Renewable Energy Transition: Wind, Solar

Nov 13, 2025 · A diverse renewable mix Wind and solar form the backbone of Portugal's electricity supply, supported by hydropower and growing investments in energy storage. Coastal wind ...
