# Price of home energy storage power system

## Overview

---

On average, you can expect to pay between \$5,000 and \$15,000 for a good system. This price usually includes the battery, installation, and any necessary equipment. How much does energy storage cost?

Different places have different energy storage costs. China's average is \$101 per kWh. The US average is \$236 per kWh. Knowing the price of energy storage systems helps people plan for steady power. It also helps them handle money risks. As prices drop and technology gets better, people need to know what causes these changes.

How much does home battery storage cost?

The cost of home battery storage has plummeted from over \$1,000 per kilowatt-hour (kWh) a decade ago to around \$200-400/kWh today, making residential energy storage increasingly accessible to homeowners.

How much does energy storage cost in 2024?

As we look ahead to 2024, energy storage system (ESS) costs are expected to undergo significant changes. Currently, the average cost remains above \$300/kWh for four-hour duration systems, primarily due to rising raw material prices since 2017.

How much does energy storage cost in 2025?

In 2025, they are about \$200-\$400 per kWh. This is because of new lithium battery chemistries. Different places have different energy storage costs. China's average is \$101 per kWh. The US average is \$236 per kWh. Knowing the price of energy storage systems helps people plan for steady power. It also helps them handle money risks.
