

# **Price per 60kWh Smart Photovoltaic Energy Storage Container**

## Overview

---

Because of all these variables, the \$280–\$580/kWh range is best used as a quick planning guide—useful for early budgeting, screening opportunities, or checking whether a quote is broadly in line with market expectations. How many kWh does a solar battery deliver?

**START SOLAR DESIGN** These solar batteries are rated to deliver 60 kilo-watt hours kWh per cycle. Check your power bills to find the actual kWh consumption for your home or business. Find the average per day and the peak daily kWh consumption. We have solar battery packs available that provide power storage from 1kWh to more than 100 kWh.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.

How long does a PV solar system last?

In general, the payback time can range from 5 to 10 years. However, it depends on several factors, such as the initial cost of the system, available incentives, rebates, the cost of electricity where you live, and the amount of PV solar electricity you can store and use.
