Prices of unsold solar modules in Sydney Australia

Overview

Are solar panels expensive in Sydney?

The short answer: Prices vary depending on system size, brand, quality, and installation — but the good news is, solar in Sydney is more affordable than ever. This guide will give you a clear breakdown of solar panel costs in Sydney, including: The cost of solar panels in Sydney has dropped significantly over the last decade.

How much does a solar system cost in Australia?

As of September 2025, the average cost of a residential solar system in Australia is around \$0.88-\$0.95 per watt installed after the federal STC rebate. This means a 6kW system typically costs \$4,000-\$6,000, while a 10kW system costs \$7,500-\$10,500. Prices vary by city, with Darwin at the higher end and Perth at the lower end.

How much do solar panels cost in Sydney in 2025?

In 2025, solar panels in Sydney cost between \$3,000 – \$12,500, depending on system size and quality. Thanks to rebates and falling technology costs, solar is more accessible than ever. For most homeowners, a 6.6kW system offers the best balance between affordability and savings, with a 3-5 year payback period.

How much does a solar system cost?

The cost of installing a solar panel system is factored into the sale price of the solar system. For example, if a company advertises a 6.6kW solar panel system's price as \$6,310, this price includes installation after the solar panel rebate. Panels – The solar panels represent the largest cost when installing a system.
