

# **Procurement of 60kWh Solar Container for Rural Use**

## Overview

---

What is a solar power purchase agreement (PPA)?

A solar power purchase agreement (PPA) is a financial contract in which a third-party developer owns, operates, and maintains the photovoltaic system, and a customer agrees to purchase the system's electric output from the solar services provider for an agreed-upon price and for a predetermined period.

What is a solar RFP?

But first a few key definitions: A Request for Proposal (RFP) is a formal bid document to ask vendors to provide proposals for desired projects, as required by many public agencies (federal, state, local). A solar RFP outlines the photovoltaic (PV) product or service requirements, the contract terms, and bidding process.

Where are solar systems hosted?

The systems may be hosted on-site, such as the customer's roof, or at an off-site location. EPA developed a solar RFP document checklist to keep track of key components, such as scope and deliverables, specific requirements, and RFP submission process and key dates.
