What are the different types of solar energy containers?

Solar Panels: The foundation of solar energy containers, these panels utilize photovoltaic cells to convert sunlight into electricity. Their size and number vary depending on energy requirements and sunlight availability. **Batteries:** Equipped with deep-cycle batteries, these containers store excess electricity for use during periods of low sunlight.

Can you put solar panels on a container?

We put solar panels on a container for a guy who was powering an RV on his land. He had a generator, and the container was full of batteries to support himself. When we're on top of a container, we need to build a custom racking system to hold up more than one row of panels, which what we ended up doing for him. (See in image with tan container.)
