

# Replace the solar panel solar light battery

## Overview

---

Should I replace my solar light batteries?

For example, if your solar lights had NiCd or NiMH 1.2V 600mAh AA batteries, then we would recommend you replace them with our 1.2V NIMH AA 600mAh solar light batteries. The capacity of your old batteries is usually printed on the batteries in a mAh rating.

How often should solar light batteries be replaced?

Worn-out solar light batteries may result in acid leakage, which can cause damage to the solar light's electrical components. It's a good idea to replace the rechargeable solar light batteries at least once a year to ensure adequate lighting and longevity. Which are the most suitable replacement batteries for my solar garden lights?

.

How do I replace the battery in my solar panel?

To replace the battery in an Allsop Home & Garden solar panel, unscrew the screws and separate the two halves of the solar housing compartment. Remove the old battery and replace it with a new rechargeable battery. Insert the screws back into their holes and screw the two halves of the solar housing compartment back to together securely.

How do you replace a battery in a solar garden light?

The short answer is that in most solar garden lights you can simply remove the battery cover, take out the old batteries which came fitted with the device, and replace the battery with a new rechargeable battery of the same specification. But which type of battery do you need?

Are there any other special steps you must take?
