

Requirements for new energy and energy storage

Overview

Does the energy storage strategic plan address new policy actions?

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage Strategic Plan periodic update requirement of the Better Energy Storage Technology (BEST) section of the Energy Policy Act of 2020 (42 U.S.C. § 17232 (b) (5)).

Will energy storage change the development layout of new energy?

The deployment of energy storage will change the development layout of new energy. This paper expounds the policy requirements for the allocation of energy storage, and proposes two economic calculation models for energy storage allocation based on the levelized cost of electricity and the on-grid electricity price in the operating area.

What factors must be taken into account for energy storage system sizing?

Numerous crucial factors must be taken into account for Energy Storage System (ESS) sizing that is optimal. Market pricing, renewable imbalances, regulatory requirements, wind speed distribution, aggregate load, energy balance assessment, and the internal power production model are some of these factors .

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.
