

Riga Power Station Construction

Overview

How many hydropower units are there in Riga?

Riga hydroelectric power plant (HPP) started producing electricity in the middle of 1970s. It has six hydropower units with total capacity of 402 MW. Currently, in Riga HPP there is a hydropower unit reconstruction project underway, with expected completion in 2022.

Where is Riga hydro power project located?

Riga is a 402MW hydro power project. It is located on Daugava river/basin in Riga, Latvia. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently active. It has been developed in a single phase. Post completion of construction, the project got commissioned in 1974. [Buy the profile here.](#)

When was the Riga hydroelectric power plant built?

The Riga Hydroelectric Power Plant was put into operation in 1974. In order to build Riga HES, a dam was constructed across the Daugava River through the middle of Doles Sala, half of which has since been flooded to make room for Riga Reservoir.
